Tips to help you and your child

1. Be patient with yourself and your child. As you help your child remember that different things work at different ages.
2. Early in the school year help your child with the following:
 - provide a binder with dividers
 - use an agenda/planner for school
 - set up a "home office" for homework to be done etc and provide storage for paperwork, assignments, projects etc.
3. Doing homework @ home should involve breaks, a healthy snack to keep them going and help them with long term project planning.
4. Get things ready for school the night before to avoid forgetting something important.

It's easier to manage homework when students are organized.
